Epoxy Coated Rebar
by CMC - Commercial Metals Company

SCREENING DATE: 2026-04-17
PUBLISHED DATE: 2026-04-17
EXPIRY DATE: 2029-04-17
PREPARER: Self-Prepared

Health Product Declaration v3.0
created via: HPDC Online Builder

HPD UNIQUE IDENTIFIER: 114135618560
HPD UNIQUE PRODUCT ID: Not provided.
CLASSIFICATION: 03 21 00 Reinforcement Bars
PRODUCT TYPE: Reinforcement Components, Epoxy-Coated Steel
PRODUCT DESCRIPTION: CMC's epoxy-coated reinforcing steel consists of carbon steel rebar coated with a fusion-bonded epoxy layer to provide enhanced corrosion resistance in concrete applications. The product is commonly used in structures exposed to moisture, chlorides, or other corrosive conditions, including transportation, marine, and infrastructure projects. The epoxy coating helps protect the steel reinforcement and supports extended durability and service life of concrete assemblies.

Section 1: Summary

Nested Method / Product Threshold

CONTENT INVENTORY

Inventory Reporting Format
→ Nested Materials Method

Threshold Disclosed Per
→ Product

Threshold Level
→ 100 ppm

Residuals/Impurities Evaluation
Completed in **2** of **2** Materials

Explanation(s) provided for Residuals/Impurities?
Yes

For all contents above the threshold, the manufacturer has:

Characterized Yes
Provided weight and role.

Screened Yes
Provided screening results using HPDC-approved methods.

Identified No
Provided name and CAS RN or other identifier.

CONTENT IN DESCENDING ORDER OF QUANTITY

Summary of product contents and results from screening individual chemical substances against HPD Priority Hazard Lists and the GreenScreen for Safer Chemicals®. The HPD does not assess whether using or handling this product will expose individuals to its chemical substances or any health risk. Refer to Section 2 for further details.

Nanomaterial ... No

INVENTORY AND SCREENING NOTES:

The names and CAS numbers of the ingredients in the epoxy coating are withheld to protect proprietary information.

VOLATILE ORGANIC COMPOUND (VOC) CONTENT

VOC Content data is not applicable for this product category.

COMPLIANCE *See Section 3 for additional listings.*

VOC emissions: Inherently non-emitting source per LEED

CONSISTENCY WITH OTHER PROGRAMS

Pre-checked for LEED v4 Option 1.
Pre-checked for LEED v4.1 Option 1.
Pre-checked for LEED v5 Human Health 1.

Section 2: Content in Descending Order of Quantity

This section lists contents in a product based on specific threshold(s) and reports detailed health information including hazards. This HPD uses the inventory method indicated above, which is one of three possible methods:

- *Basic Inventory method with Product-level threshold.*
- *Nested Material Inventory method with Product-level threshold*
- *Nested Material Inventory method with individual Material-level thresholds*

Definitions and requirements for the three inventory methods and requirements for each data field can be found in the HPD Open Standard version 3.0, available on the HPDC website at: www.hpd-collaborative.org/hpd-3-0-standard

BASE METAL **%: 99.2300 - 99.7500**

PRODUCT THRESHOLD: 100 ppm RESIDUALS AND IMPURITIES EVALUATION COMPLETED: Yes MATERIAL TYPE: Metal

RESIDUALS AND IMPURITIES NOTES: The inventory is based on the company's metallurgical analyses of the rebar by grades. Complete formulation disclosure was provided, including residuals and impurities, down to a 100 ppm threshold.

EPOXY COATING

%: 0.2500 - 0.7700

PRODUCT THRESHOLD: 100 ppm RESIDUALS AND IMPURITIES EVALUATION COMPLETED: No MATERIAL TYPE: Polymeric Material

RESIDUALS AND IMPURITIES NOTES: Residuals and impurities data were provided by one epoxy coating supplier. Other suppliers' coatings are expected to be similar, but detailed information was not disclosed. This HPD reflects only the data from the supplier that provided full information.

OTHER MATERIAL NOTES: CMC sources epoxy coatings from multiple suppliers; however, detailed ingredient information was provided by only one supplier. While formulations across suppliers are expected to be similar, slight variations may occur. The other suppliers confirmed that their coatings do not contain harmful chemicals but, due to internal policies, were unable to share full formulation details. As a result, this HPD reflects the composition of the epoxy coating from the single supplier that provided complete information.

Section 3: Compliance

This section lists applicable certification and standards compliance information for VOC emissions and VOC content. Other types of health or environmental performance testing or certifications completed for the product may be provided.

VOC EMISSIONS | **Inherently non-emitting source per LEED**

COMPLIANCE TYPE: Self-declaration
CERTIFIER/VERIFIER/TESTING LAB/AUDITOR: None
COMPLIANCE DETAILS:
COMPLIANCE SCOPE:
APPLICABLE FACILITIES: All
COMPLIANCE URL:
COMPLIANCE NOTES: Metals—including powder-coated, plated, or anodized metals—are inherently non-emitting sources of VOCs, according to LEED® v4. CMC uses fusion-bonded epoxy coating on its epoxy coated rebar, which is applied as a powder and then cured. Cured product would generally meet the intent since it does not release VOCs in service.

ISSUE DATE: 2025-12-02

EXPIRY DATE: No expiration

Section 4: Accessories

This section lists related products or materials that the manufacturer requires or recommends for installation (such as adhesives or fasteners), maintenance, cleaning, or operations. For information relating to the contents of these related products, refer to their applicable Health Product Declarations, if available.

No accessories are required for this product.

Section 5: General Notes

All types and grades of rebar can be epoxy-coated at CMC’s epoxy coating fabrication facilities to provide corrosion protection in specific environmental conditions.

Section 6: References

The Health Product Declaration (HPD) Open Standard provides for the disclosure of product contents and potential associated human and environmental health hazards. Hazard associations are based on the HPD Priority Hazard Lists, the GreenScreen List Translator™, and when available, full GreenScreen® assessments. The HPD Open Standard is not:

- *a method for the assessment of exposure or risk associated with product handling or use,*
- *a method for assessing potential health impacts of: (i) substances used or created during the manufacturing process or (ii) substances created after the product is delivered for end use.*

Information about life cycle, exposure and/or risk assessments performed on the product may be reported by the manufacturer in appropriate Notes sections, and/or, where applicable, in the Certifications section.

The HPD Open Standard was created and is supported by the Health Product Declaration Collaborative (the HPD Collaborative), a customer-led organization composed of stakeholders throughout the building industry that is committed to the continuous improvement of building products through transparency, openness, and innovation throughout the product supply chain.

The product manufacturer and any applicable independent verifier are solely responsible for the accuracy of statements and claims made in this HPD and for compliance with the HPD standard noted.
