Re: Conflict Minerals Statement

Commercial Metals Company shares the concerns of Congress and the international business community that profits from the mining of cassiterite, columbite-tantalite, gold, wolframite and their derivatives tin, tantalum and tungsten ("Conflict Minerals") in the Democratic Republic of Congo ("DRC") or its adjoining countries may be aiding human rights abuses in portions of the DRC.

In July 2010, the United States Congress passed legislation mandating supply chain due diligence and public disclosure related to the sourcing of these Conflict Minerals. In August 2012 the Securities Exchange Commission ("SEC") issued its Final Rule governing, *inter alia*, due diligence, disclosure and reporting requirements for Conflict Minerals from the DRC or its adjoining countries under the legislation. Commercial Metals Company is committed to legal and ethical compliance in all its business practices and will comply with this legislation, along with the implementing regulations issued by the SEC.

Commercial Metals Company does not intentionally add any conflict minerals listed in the Frank-Dodd Act of 2010 to any of its steel products at any of its steelmaking facilities. Any amounts of these three elements in our steel analysis is due to background levels related to the recycling of scrap steel.

Respectfully,

Jacob Selzer
Metallurgical Engineering Technologies Manager
