

CHROMX[®]

ChromX[®] Products

CMC specializes in high strength and corrosion resistant steel products, so designers can utilize the high strength efficiencies and best match the corrosion protection requirements of the application.

ChromX[®] 9000 (ASTM A1035 CS Grade 100 or 120) provides both high strength and high corrosion protection for any corrosive environments, including severe. Designers can expect to meet 100-year service life requirements called for on many infrastructure projects by specifying ChromX[®] 9000.

ChromX[®] 4000 (ASTM A1035 CM Grade 100 or 120) can be specified for projects requiring a less than 100-year service life. Contact your CMC sales representative for more information about 4000.

All materials made in the USA.

**DESIGN ACCORDING
TO ACI 318-19 CODE**
