

it's what's **inside** that counts

Environmental Policy

As part of Commercial Metals Company's Guiding Principles, CMC takes seriously the responsibility that comes with being a good corporate citizen. We're dedicated to making a positive impact in our local communities where we live and work. And at the core of what we do to better our communities, we encourage recycling, recovery and reuse of residual materials.

CMC is committed to conducting all aspects of our business to ensure we are in compliance with state and federal environmental rules, including all applicable laws, regulations, permits and authorizations and internal requirements governing our operations.

We endeavor to communicate effectively with our employees, neighbors and stakeholders, and continually improve our environmental compliance program through regular evaluations and technological advances. And by identifying areas where we can do better than compliance, we are preventing pollution, avoiding and minimizing environmental impacts, and using advances in technology to operate our facilities in a cleaner, more sustainable way.
